A line graph is plotted on a white background. The x-axis is a horizontal line at the bottom. The y-axis is a vertical line on the left. A black line starts at the origin (0,0) and extends upwards and to the right. The area under this line is shaded in light blue. A red box is drawn over the shaded area, containing the text "4-10" in red. The box is positioned such that its bottom edge is above the x-axis and its top edge is below the black line. The text "4-10" is centered within the box.

The diagram features a light gray rectangular box in the center containing the red text '5-19'. To the right of the box, a smooth, dark gray curved line starts from the top right, curves downwards and to the left, passing behind the box, and then continues downwards and to the right towards the bottom right corner. On the left side of the image, there are two parallel, slightly slanted dark gray lines. A small black dot is positioned between these two lines, roughly in the middle vertically.

A diagram on a white background. A thin black line starts from the left edge, about two-thirds of the way down, and extends diagonally upwards to the right edge, about one-fifth of the way down. A light gray square box is positioned in the center of the image, with the text "6-10" inside it in a red, monospace-style font. The line passes through the box, starting below the text and ending above it.
