A geometric diagram featuring several lines. A horizontal line is intersected by a vertical line. From the intersection point, a line extends upwards and to the right, and another extends upwards and to the left. A small circle with a cross inside is located at the intersection of the horizontal and vertical lines. A line segment connects the top of the vertical line to the line extending upwards and to the right. Another line segment connects the top of the vertical line to the line extending upwards and to the left. A horizontal line segment is also present to the right of the vertical line.
